IMPORTANT NOTICE.

When moulding is priced by the inch *it is in all cases understood* that the price is based on ripping width of lumber, that is: $\frac{1}{4}$ of an inch wider than the finished size of moulding. For example: A $\frac{1}{8}$ inch thick panel moulding if made to finish $1\frac{1}{4}$ inches wide, would be charged as 2 inches (being ripping size); to finish full 2 inches, would be charged as $2\frac{1}{4}$ inches, etc.

Approximate weight of Mouldings, 1x1 inch, per 100 lineal feet, 15 pounds.
